

### THE ENVIRONMENTAL EXPERTS

PART OF THE GRG WASTE UK GROUP

## WHO WE ARE

BKP was formed in 1964 as the Bennett & King Partnership and operated as an agricultural contractor, cleaning out piggeries and spreading sewage sludge on fields.

Over five decades later, BKP specialise in the treatment, recycling, recovery, and disposal of all forms of waste for businesses in all sectors.

What makes BKP so unique in the waste management industry is our innovative waste treatment capabilities, allowing us to maximise the recycling and recovery potential of your waste.

With further access to viable waste-to-energy routes, we will always utilise the most sustainable solution for your waste streams, with the aim of supporting and improving our environment.

# NATIONAL COVERAGE

Being a part of the GRG Waste UK Group extends our facilities and services further, with access to fully licensed waste transfer sites situated in Bootle, Hinckley, Kidderminster, Romsey, and Dundee. You can be assured, no matter where you are in the UK, we can reach you efficiently.

### HAZARDOUS WASTE MANAGEMENT

#### SITE VISIT 2.

Our waste management professionals will audit your site and waste streams and advise on the most suitable and cost-effective service and container for the types and volume of waste you produce.

#### **WASTE ANALYSIS 4.**

Your waste is analysed in one of our fully equipped, on-site laboratories, and if as described, the waste is processed, and an invoice is provided.

#### 1. KEY ACCOUNT MANAGER

You will be allocated a Key Account Manager who will be your point of contact throughout your waste management partnership with BKP.

#### 3. EXCHANGE AND COLLECTION

Your container is exchanged, and your waste is collected and delivered by a fully trained ADR driver into one of our waste management facilities, unless it is sent directly to the end treatment, recovery, or disposal site.

#### 5. SUSTAINABLE SOLUTIONS

Your waste is recovered, recycled, or disposed of using the most compliant, cost effective and sustainable solution available for your waste streams.

### HAZARDOUS WASTE

Here at BKP, we have over 50 years' experience managing hazardous wastes. Our Romsey site is fully accredited ISO 9001, 14001, and 45001 for waste management with a well-equipped onsite laboratory to provide comprehensive testing of samples.

Our site is permitted to accept a wide range of waste streams, with flexible treatment and recovery solutions. Some hazardous waste streams we currently handle include:

- ACIDS
- ALKALIS
- PAINTS, RESINS, & ADHESIVES
- FUELS AND SOLVENTS
- OILS, OIL & WATER, OILY SLUDGES
- HAZARDOUS SLUDGES & SOILS
- RAGS & WIPES

- CONTAMINATED PACKAGING
- BATTERIES
- WEEE
- AEROSOLS & GAS CYLINDERS
- ASBESTOS
- LABORATORY SMALLS

We will always work to try and promote material to the top of the waste hierarchy.

LIQUID TREATMENT PLANT

Here at BKP, we have invested heavily in a unique liquid treatment plant to offer you cost effective inhouse treatment services for your contaminated liquids and sludges to maximise recovery and recycling of the wastes.

**INTERCEPTOR WASTE** 

**AQUEOUS WASTE** 

**CUTTING SOLUBLE OIL** 

**DRILLING MUD & SLUDGE** 

**BILGE WASTE** 

LIQUID OIL

### TANKER SERVICES

We offer bulk ADR haulage services to remove, transport and recycle liquids and solid wastes effectively and safely. This can be uplifted by a vac tanker or curtain sided vehicle. Whether the waste has come from a bulk storage tank, interceptor, sewage treatment plant, a spill or packaged containers such as drums and IBC's, we have all the expertise and equipment to ensure that your facilities are left clean and safe.

- **SPECIALIST ADR 27,000LTR ARTIC TANKERS**
- **OVER INTERIOR OF A PARTICIPATION OF A PARTICIPATIO**
- **W** LINED ACID BARRELS
- **SOLUTION** LAGGED FUEL TANKERS FOR HEATED PRODUCTS
- **W** HIGH SUCTION TANKERS TO PUMP WASTE

MOBILE TECHNICAL SERVICES

Here at BKP we understand that hazardous waste is a complex area that requires strict adherence to guidelines and regulations, which is why we offer mobile chemist services.

Our professional team of qualified chemists will visit your site to identify, sample and list your waste, and can also re-pack, collect and dispose of the waste in a timely manner.

Where sampling is required, we offer an in-house laboratory analytical service to ensure the material is removed compliantly and cost-effectively.

### CONTAINER SUPPLY

As part of our container supply service, one of our expert team can visit your site to advise on the most suitable container for your waste streams and can advise on booking for regular scheduled collections dependent on the volume of waste you produce.

Our 1100L BKP Blue Bin has wheels and FLT pockets for easy movement, and is suitable for:

- INDUSTRIAL WIPES
- OILY RAGS
- PPE
- DRY GRANULES, SPILL MATS & BOOMS
- GREASE & GREASE CARTRIDGES
- NIL FREE LIQUIDS

### CONTAINER RECONDITIONING & RECYCLING

We have recently invested in a brand-new Container Reconditioning and Recycling Plant. The process works in 3 stages:

- **1. Decontamination -** The decontamination process enables the treatment of flammable or highly contaminated IBCs, drums, or smaller containers in line with BAT [best available technology].
- 2. Washing and Pressure Testing IBC containers are then sent for complete cleaning, drying, and pressure testing, and containers abiding by UN standards are safe for reuse.
- **3. Granulation and Recovery -** Small and damaged containers not suitable for reuse are granulated, washed, and used as raw material for container manufacturing.

WASTE TO ENERGY ROUTES

The group benefits from a diverse network of offtake partners across Europe, offering unique recovery routes for hazardous and specialist wastes, including pharmaceuticals, sludges, filter cake, solvents, paints, ink, adhesives, resins, and contaminated rags and packaging.

Recycling solutions vary between waste streams, from generating heating and electricity for local communities, and being used as a fuel substitute in the production of concrete blocks.

### WHY CHOOSE BKP?

#### **IN-HOUSE SERVICES**

We have in-house industrial services teams, in-house treatment facilities, and a fleet of vehicles for compliant, timely and cost-effective completion of almost any task.

#### **SUSTAINABLE SOLUTIONS**

We have in-house treatment facilities within the group to maximise the recycling and recovery potential of your waste, and an extensive network of recovery routes within Europe to further recover difficult wastes.

#### **NATIONAL COVERAGE**

Being part of the GRG group means we have access to 5 waste transfer and treatment facilities across the UK, each with their own in-house fleet of vehicles and experienced chemists.

### HERE'S WHAT OUR CUSTOMER'S SAY....

We have used BKP over many years now and we highly recommend their services. We mainly use their interceptor cleaning and bulk services but, on this particular day due to circumstances out of our control, we had to call them for their Emergency Spill Response. Within 2 hours, 3 men arrived on our site who worked continuously for 3 hours to help us clean the spillage. From ourselves and our tenant, we would like to thank those men and BKP for going that little bit further.

66

at every level, we find all staff to be knowledgeable, enthusiastic and approachable. All enquiries are dealt with promptly and they are always willing to find a solution to any problem. I wouldn't hesitate in recommending BKP to anyone looking for help with their waste management needs.
